Improving Processes. Instilling Expertise.

Driller / Safety Awareness Checklist

1. Always perform daily maintenance before starting or tramming the machine

Driller / Safety Awareness Checklist

2. Always inspect in
around and below machine
for oil and fuel leaks

Driller / Safety Awareness Checklist

3. Always inspect machine for worn or frayed hydraulic hoses and electrical wires

Driller / Safety Awareness Checklist

4. Always inspect the working area for hazards prior to trammimg the machine onto the drilling site

Driller / Safety Awareness Checklist

5. Always use the seat belt when tramming the machine

Driller / Safety Awareness Checklist

6. Always lock out and tag out the machine when broken to prevent accident or injury

Driller / Safety Awareness Checklist

7. Always use safety belt and tether when working above ground level

Driller / Safety Awareness Checklist

8. Always use safety belt and tether when working near the crest of the bench or near the high wall

Driller / Safety Awareness Checklist

9. Always observe angle indicators in cabin when tramming in rough and uneven terrain

Driller / Safety Awareness Checklist

10. Always keep outside mirrors clean properly adjusted and in good repair

Driller / Safety Awareness Checklist

11. Never perform work in the hazard area when making repairs alone

Driller / Safety Awareness Checklist

12. Never allow visitors to enter the hazard area without specific purpose and permission

Driller / Safety Awareness Checklist

13. Never allow visitors to be around machine and be out of eye contact

Driller / Safety Awareness Checklist

14. Never work under an unsupported boom or its components

Driller / Safety Awareness Checklist

15. Never exit cab without all required safety equipment related to working environment

Driller / Safety Awareness Checklist

16. Never loiter in hazard area with back turned to rock drill and feed rail

Driller / Safety Awareness Checklist

17. Never refuel the equipment with engine running or when engine is hot

Driller / Safety Awareness Checklist

18. Never install drill bit with hand(s) holding the impacting face

Issue rip-off clothes?

Driller / Safety Awareness Checklist

19. Never operate equipment when fuel and oil leaks are present

Driller / Safety Awareness Checklist

20. Never allow anyone not thoroughly trained on the equipment to operate the equipment

Driller / Safety Awareness Checklist

21. Never operate machine when wire braiding in a hose(s) is showing and damaged

Driller / Safety Awareness Checklist

22. Never climb or crawl on the equipment surfaces that are wet or slippery

Driller / Safety Awareness Checklist

23. Always conduct yourself in compliance with MSHA/OSHA regulations
